Want to take a peek into the future?

You can do it almost literally at the World Future Verse international conference, organized by the Ljubljana Technology Park in co-organization with MIPRO and other partners.

The conference will discuss the hottest topics at the moment: **Metaverse, NFT, Internet 3.0 and Blockchain** technologies, which are also the ticket to successful business in the future, and understanding of marketing and new business opportunities.

World Future Verse Conference is aimed at the brightest and most curious minds of our time by bringing together leaders and creative visionaries from different industries.

Don't stay behind and co-create your future from **September 29 to October 1** at the most picturesque place in Slovenia - **Festival Hall in Bled**.
