**Andrea Čović Vidović** is an EU policy, communication and diplomacy professional with nearly 20 years of experience across the European Commission, European Parliament, Croatian public administration and the private sector. As Deputy Head and Spokesperson at the European Commission Representation in Croatia, she leads strategic outreach and media engagement on EU priorities. Her work has earned recognition through Grand PRix, SoMo Borac and Diplomacy & Commerce shortlists. A Fulbright PhD, Chevening and DAAD alumna, she is active in leadership development, mentorship and multi-topic public speaking.

## From AI Policy to Economic Reality

“From AI Policy to Economic Reality” explores how Europe is turning artificial intelligence from a regulatory debate into a strategic economic project. The European Commission is now focused not only on trustworthy rules, but on building the infrastructure, investment environment and talent ecosystem needed for European AI to scale — from AI Factories and supercomputing capacity to startup financing, digital skills and industrial deployment. At a time of intense global technological competition, the discussion is increasingly about Europe’s ability to transform its scientific excellence and democratic values into innovation, competitiveness and technological sovereignty.
