Step forward Towards Anorganic Intelligence

Opatija, May 27, 2026  
Grand Hotel Adriatic

**Anders Dam Jensen** is the Executive Director for the European High Performance Computing Joint Undertaking since September 2020. This appointment is the continuation of a lifelong interest in supercomputers, starting from his time at the Technical University of Denmark, from which he holds a Master of Science Degree and a Master of Business Administration. After spending the first part of his career working in engineering and pioneering IEEE802.11 wireless network technology with Symbol Technologies, Anders joined Cargolux Airlines International as Director IT and was instrumental in the spinoff of the Cargolux IT department into CHAMP Cargosystems S.A. In 2011, Anders became Director ICTM for NATO, and took on responsibility for all Information and IT services as well as one of the largest classified networks in Europe.

## Networking & Institutional Exchange

This presentation outlines how EuroHPC is transforming Europe's economic competitiveness by deploying world-class supercomputing, AI Factories, AI Gigafactories, and emerging quantum technologies. It highlights concrete impacts on industry, research, and public services through large-scale AI training, high-performance simulation, and data-driven innovation.

The presentation shows how federated, energy-efficient infrastructure directly supports SMEs, strategic industrial sectors, and skills development. By linking public investment with private-sector uptake, EuroHPC accelerates time-to-market, strengthens supply chains, and underpins Europe's digital and economic sovereignty.
